## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 18-19, 24 and 27-28, drawn to a system having a light shielding device positioned between an entrance surface of an erecting prism system and an exit surface of the erecting prism system for preventing an off-field light bundle incident on the erecting prism system from reaching the eyepiece of the system, classified in class 359, subclass 431.
- II. Claims 12-17, 20-23, 25-26 and 28, drawn to a system having a light shielding device positioned between a semitransparent film located between an objective lens and an eyepiece and a focus detecting device for preventing an off-field light bundle incident on the semitransparent film from reaching the focus detecting device, classified in class 359, subclass 601.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility for use in a survey device without the use of a light shielding element for preventing an off-field light bundle incident on the semitransparent film from reaching the focus detecting device as defined in the invention II. See MPEP § 806.05(d).

Art Unit: 2872

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Lyddane William on 9/10/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
